

Decock Plants has its headquarters in Comines, Belgium, and is a major player in the production of young plants for professional growers. Decock currently exports to 34 countries worldwide. This growing company is characterised by a commitment to the highest quality, ongoing investment in people and resources, a spirit of entrepreneurship, and a no-nonsense family mentality.

Desa Plants is a subsidiary of Decock Plants which produces cuttings of ornamental plants. It is located in Ejersa, 83 km from Addis Ababa, the capital of Ethiopia. Desa Plants employs 750 people.

We are currently looking to hire new colleagues to be based in Ethiopia.

Cultivation Manager

In this role you will form part of a successful team with the Production Manager, Quality Manager and Plant Manager. You will work closely with the Global Production Manager. You will supervise cultivation processes and achieve cultivation targets (from analysing and stating the problems through to translating decisions into cultivation actions). You will also be responsible for proposing solutions in close collaboration with the team of growers.

Required profile

- You hold a degree in engineering, biotechnology, horticulture or agriculture, or have equivalent experience
- You have experience as well as a solid education and knowledge of the sector
- You have good written & verbal communication skills in English
- You are willing to live close to or on the farm – family is welcome and accommodation will be provided

What we offer:

- Salary will be adjusted in proportion with level, efforts and results
- You will benefit from a stimulating and challenging working environment
- You will be employed by a company which is a leader in its sector.

Send your application letter to HR@desaplants.com. We will handle your application promptly and in confidence.
